COMPARISON MEASUREMENT OF RADON IN SOIL GAS AT RADON
REFERENCE SITES IN THE CZECH REPUBLIC

SEPTEMBER 15, 2014

QUESTIONNAIRE

1. Information on your team:

Organization:

Address:

Name(s) of participant(s)

E-mail:

Mobile phone:

2. Information on the method you will use

Soil gas sampling method

Type of sampling probe (*please mark*):

„Neznal” probe packer probe other (*please specify*)

Method of soil gas sampling (*please mark*):

Pump/continuous syringe (janette) other (*please specify*)

Radon measuring method (*please mark*):

Ionization chambers Lucas cells other(*please specify*)

Model and producer of instrument:

Expected total time you will need to realize field measurement at two reference sites (i.e. 2 x
10 stations = 20 measurements (hours):

3. Information on your requirements

We have following demands concerning the tools in the field (hammers, sampling probes, soil drills, electric power, etc. - *please specify*):

We have following demands concerning the transport from Prague to the reference sites and back:

Monday, 15 September 2014 number of persons (*please specify*):

To be sent back as soon as possible to: RADON v.o.s, Novakovych 6, 180 00 Praha 8, Czech Rep., fax: ++420 2 66317550, e-mail: radon@comp.cz
