

Calibration of devices in accredited Calibration laboratory SÚJCHBO (GARRM 2023)

Final info

1. Continual monitors

(Note: for the purpose of calibration, Markus10B will be calibrated together with other continual monitors)

Australia (Andrew Yule), Rad7

Estonia (Priit Kasemaa), Markus10B

Portugal (Alcides Pereira, Sergio Seco), AlphaGuard PRO

Romania (Alexandra Cucos), Rad7

Great Britain (Finlay Banks, Thomas Barlow), probably AlphaGuard – will be specified

Expected time schedule:

On Monday, 18th September, 2023, during the (late) afternoon, the devices will be picked up at the reference area Buk for transport to SÚJCHBO.

A responsible person from SÚJCHBO will discuss with all participants any important details. It is useful to prepare some simple operation manual and pack it for transport together with owner's contact data. Monitor will be operated (switch on/off) by SÚJCHBO's responsible person during calibration process. Please be sure, that the monitor has enough memory capacity.

On Thursday, 21st September, 2023, a responsible person from SÚJCHBO will transport all participant's continual monitors back to the conference hall of the Masarykova College, Prague (workshop venue) at least to 2 pm.

2. Grab sampling devices

Serbia (Sofija Forkapic), RAD7 this time grab sampling

Croatia (Vanja Radolic), RM-2 system

Spain (Daniel Rabago), RM-2 system

Notes:

Group from Croatia: using its own transport should arrive to the Calibration laboratory at 9.00 at the latest.

Expected time schedule, Thursday, 21st September, 2023:

| | |
|--------------|---|
| 7.45 | Meeting of participants using the organized transport in front of Masarykova college (+ Matej Neznal) |
| 8.00 | Departure of participants using the organized transport from Prague |
| 9.00 | Meeting of all participants at the Calibration laboratory |
| 9.30 – 12.30 | Measurement at the Calibration laboratory |
| 14.00 | Arrival to Prague |

Note: Small refreshment will be available at the Calibration laboratory.
